## Sprinter Pro 425 > powered stair climber

The Sprinter Pro 425 is the most powerful stair climber in Stanley's Sprinter range and the most cost-effective machine on the market in this category. With a carrying capacity of up to 425kg, the Sprinter Pro 425 stair climber trolley enables heavy and awkward loads to be manoeuvred by a single operator using remote control.

The self-levelling technology adapts automatically to stairway incline, maintaining a horizontal load at all times on the stairs. This protects the materials from damage during transportation and helps to prevent manual handling injury.

### Benefits

- > Remote control operation
- > Single operator usage
- > Self-levelling technology to protect user and load
- > Breaks safely on the stairs
- > Anti-slip high strength caterpillar tracks
- > Range of 1600 steps per charge
- > 360-degree rotation
- > Automatically switch from wheel to track mode

## Specification

- 425kg maximum capacity
- Five-speed function up to 16 steps per minute
- 3-4 hours fast charge lithium battery
- Battery meter to show remaining power
- Weight of battery unit - 3.2kg
- Turning radius - 1500mm
- Weight of machine - 92kg
- Overall size - 1620mm x 614mm x 1030mm
- Conforms to EC materials handling regulations
- Range of accessories

- ✔ Competitive finance options
- ✔ Free demonstrations
- ✔ Certificated training
- ✔ National maintenance coverage
- ✔ Preventative maintenance schedule
- ✔ 12-month parts warranty

- Data servers
- Motors
- Gas cylinders
- Construction materials
- Precision instruments
- Safes
- Telecoms cabinets
- Vending machines
